

Miracle Open World 2012 Billund, April 18th-20th

This year we have decided to change the structure of Miracle Open World (MOW).

Supplier independent

MOW2012 stands out as a supplier independent it-conference that provides a critical outline of technological trends and development within respectively Databases, Cloud & Virtualization, Programming Languages, Performance, Middleware, Business, and Mobile Development.

Professional networking

MOW2012 is a unique opportunity for professional networking and business interactions, and there is no segregation between attendees and speakers, most of whom will be present at the entire conference.

Reduced prices

Despite the program being heavier than ever, we have reduced the prices, and registration is now open with a 10 percent early bird discount until February 15th 2012.

Go to **www.mow2012.dk** for registration and continuous speaker and session announcements.

Prices: (without VAT)
